_HCA

Un techo que es resguardo cuando llueve, una torre que es hito y referencia para los navegantes, un muelle hacia el mar, un paradero hacia la calle, que en días conmemorativos es cocina común.

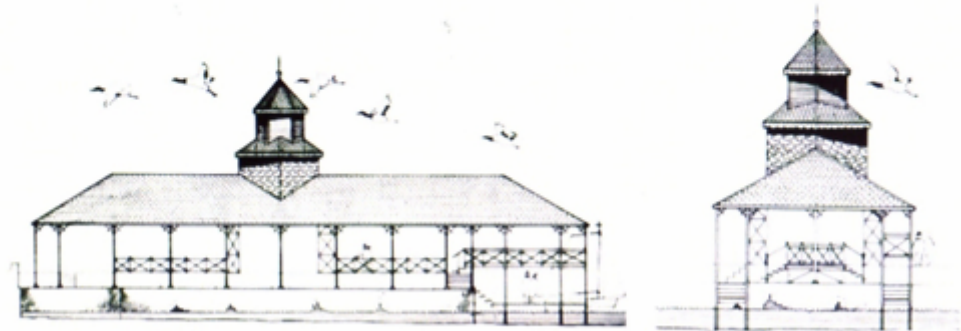

Chiloé Insular. Planta "Planta plaza borde costero Dalcahue"

Chiloé Insular. Croquis "Techo de Dalcahue"

Chiloé Insular. Imagen "Techo de Dalcahue"

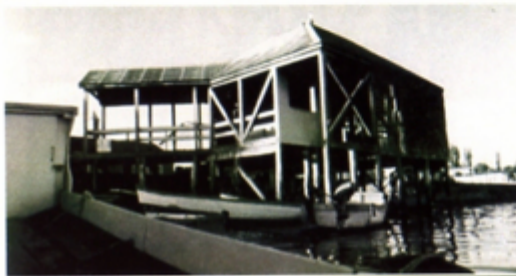

Chiloé Insular. Elevaciones "Techo de Dalcahue"

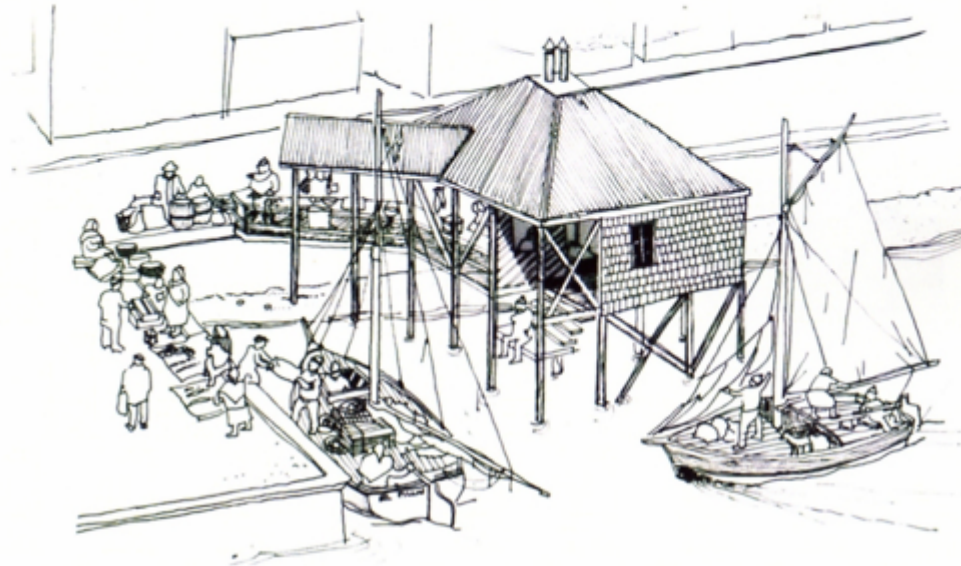

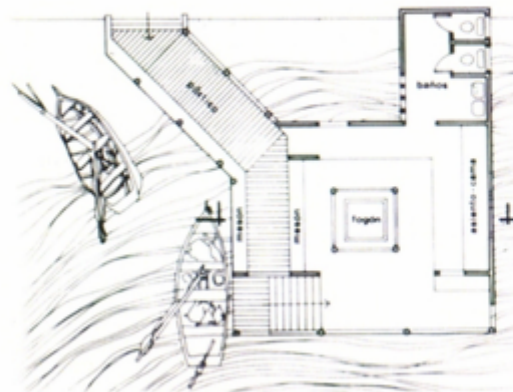

Planteado como un espacio público para navegantes. Se diseñó como un palafito que alberga en su interior un fogón, que es un espacio familiar conocido y propio de la cotidianidad de la región; en este refugio es posible cocinar, dormir, intercambiar productos y capear el mal tiempo. En la actualidad, este refugio se transformó en un pequeño museo de la tradición chilota.

An aerial photograph of Isla Quinchao, a small island in Chile. The island is densely packed with colorful houses and buildings, mostly with red and blue roofs. It is surrounded by dark, calm water. A narrow causeway or bridge connects the island to the mainland on the right side. The mainland features green fields and some trees. The overall scene is a vibrant contrast between the built-up island and the natural landscape.

An aerial photograph of Isla Quinchao, Chile. The island features a prominent grid-like street layout with numerous small buildings, mostly with red and blue roofs. A dark, sandy beach runs along the bottom edge of the town. The surrounding landscape is a patchwork of green fields and dark, forested hills. A small pier extends into the dark water at the bottom center of the town.
